INSTALOK SCREEN

The unique CAMLOK ROLLER SYSTEM ensures secure fabric attachment to roller and smooth operation.

Another added feature is the mechanical locking system that can lock the screen automatically at various intervals. The screen can be installed on the wall or ceiling. Pull it down to the required height and feel the gentle locking in the roller system. The internal mechanism is designed with reliability as the key.

When you have finished, a gentle downward tug will release the catch and you simply guide the screen back into its casing.
